

NeonX Polylingual Conversational AI Laptop Computer Debuts At CES 2019

Neon Natural Language AI Skills

User Info

neon my name is
neon what is my name
neon my email address is
neon what is my email address
neon take my user photo
neon show my user photo
neon record my user video
neon show my user video
where are you
who are you
what is my ip address

Privacy

neon erase my user data

Dialog / Wake Words Modes

require wake words
i am not alone
begin skipping wake words
neon i am alone
switch to primary dialogue
switch to random dialogue

System Update / Exit

what is my device version
neon update my device software
create a support ticket
i want to exit
i want to shutdown

Speaker / Microphone

mute volume
set volume to
what is the volume
mute microphone
set microphone volume to
what is the microphone volume

Clap Commands

enable clapping commands
set up clapping commands
disable clapping commands

Polylingual Translation

translate * to *
neon speak to me in
neon i speak
neon speak to me in * and *
neon tell me my languages
change units to metric
change units to imperial

AV Player

neon av play / yes / pause /
resume / double-clap
increase volume
decrease volume
mute volume
unmute volume
what is the volume
neon play the latest news

AV Recording

take a picture
show me my last picture
take a 3-second video
show me my last video
neon record 3 seconds
playback my last recording

Basic AI

neon say hello world
what is the time
what time is it in
what is today's date
how's the weather in
neon spell
what is 25 times 71 plus 3
what is the derivative of x
squared
what is the share price for ibm
tell me a joke
tell me about rome
send me the source for that

Brands / Coupons

neon update my brands
i like brandx
tell me coupons for
tell me my likes
read me my likes
i don't like
tell me my dislikes
tell me my favorite brands
tell me my coupons
tell me my favorite coupons
email me my coupons

Database Query

how much caffeine is in
goodbye

Transcripts

email me my transcripts
read me my transcripts
play my audio recordings

Alarms

neon set an alarm for
neon remind me to go * at
neon set a * minute timer
neon how much time is left
cancel all alarms
clear all reminders
cancel all timers

Contextual Notification and Reconveyance

reconvey my likes
reconvey my dislikes
reconvey when I

Languages

Chinese/Mandarin Danish Dutch
English French German Hindi
Icelandic Italian Japanese
Korean Norwegian Polish
Portuguese Romanian Russian
Spanish Swedish Turkish Welsh

Renton WA — January 8, 2019 - Neongecko Inc. has developed a new polylingual natural language AI laptop computer, “NeonX Touchscreen AudibleAI Enabled Ubuntu Laptop PC”. Debut is at CES 2019, the Consumer Electronics Show, Las Vegas NV January 8 to 11, 2019.

At CES, a demo of our NeonX laptop is at the Mycroft.ai booth (Sands Hall G 51507).

Neongecko is particularly excited to introduce:

- (1) Conversational interactions with AI for a wide range of personal assistant skills, on a new personal computer platform.
- (2) Unique polylingual support, where users can speak in their preferred language, and hear computer generated responses in their desired language, dialect and gender. Neon uses enabling technologies that translate more than 100 languages and dialects.

(3) A unique platform for coupons and advertising.

NeonX incorporates into our custom 3D printed enclosure: a mini Intel pc, 10" capacitive touch 1280x800 LCD display, stereo speakers, microphone, camera, keyboard, trackpad, USB-C wired connectors, internal bluetooth and wifi. Battery life is 3-4 hours.

"Neon" is the name of Neongecko's Audible AI conversational assistant, as in: "Hey Neon, what's the weather in Seattle?" Or "Neon, play some jazz music". Or "Neon, speak to me in Spanish" (or in many other languages and dialects). Neon is an enhanced version of Mycroft.ai and supports a broad range of Audible AI skills.

Links to videos showcasing Neon's conversational AI skills, audible advertising coupons and polylingual capabilities are available at the company website <https://neongecko.com>.

In addition, Neongecko offers "NeonU Universal Audio Audible AI enable PC" as a mini Intel pc, which connects to standard HDMI displays, speakers, microphones, cameras, keyboards, trackpads, using wired connectors, bluetooth and wifi. Neongecko also provides natural language AI on conversational Internet websites including <https://klat.com>.

Neon integrates voice, text, video, STT, TTS, Conversation Processing Intelligence, AI skills processing, and the latest enabling technologies: real-time Internet communications for audio and video, real-time speech processing, real-time translation, and real-time interactive conversational inquiries of content on the web and in proprietary databases. Neon software source code is available on Git (limited license).

Both NeonX and NeonU are full Linux Ubuntu PCs that come "ready to use" with both a full (opensource) office suite and installed "conversational AI". NeonX will be priced at \$799. NeonU will be priced at \$359. Sample orders are immediately available by special order.

About Neongecko - Neongecko Inc. develops applications in conjunction with Conversation Processing Intelligence Corp. (CPI). NGI and CPIC together are an IP developer and an advanced research lab developing "Conversation Processing Intelligence™" - tools that merge new computer technology, digital communications, social media and conversation processing, to improve communication. Neon, NeonX and Klat.com are based on patented technology, with 8 patents for conversation processing granted, and related applications, in the US, Europe and China. Neongecko Inc. and Conversation Processing Intelligence Corp. are located in Renton Washington.
